ShipScan

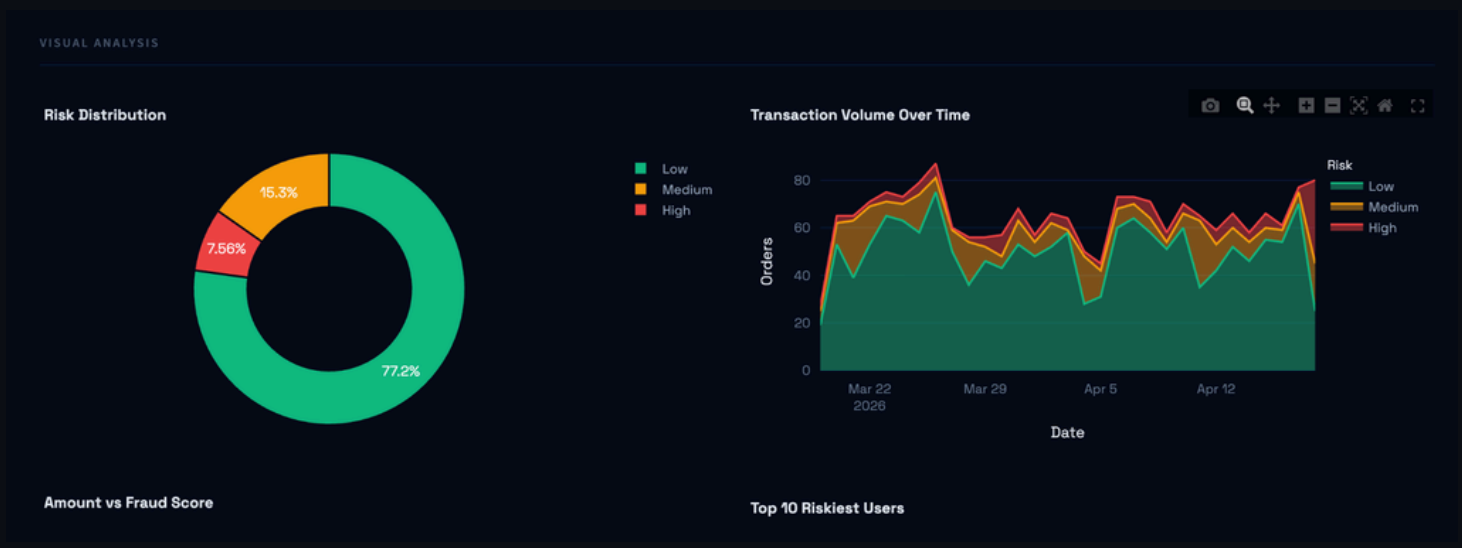
Fraud Analysis for eCommerce Sellers

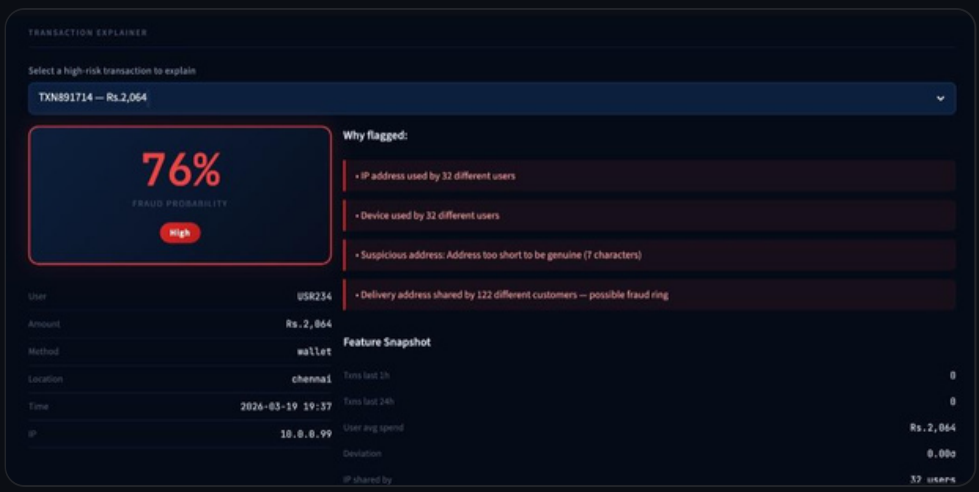
shipscan.in
contact@shipscan.in

Indian eCommerce sellers lose 3-5% of revenue to fraud every month.

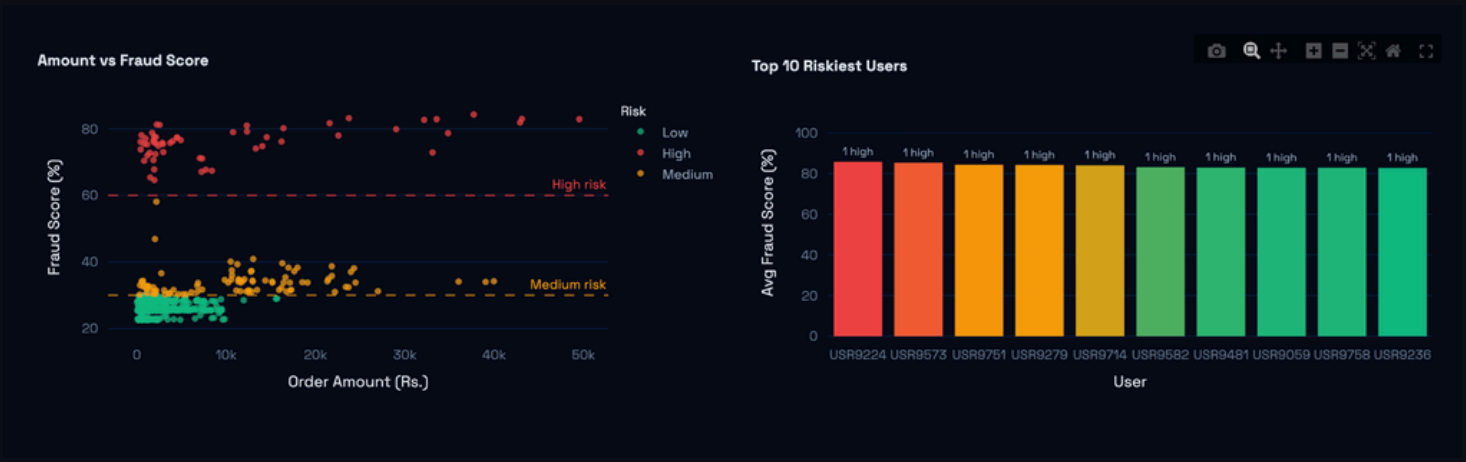
- COD rejection rates averaging 25-35%
- Fake addresses causing undeliverable orders
- Return fraud after product use
- SAFE-T claims rejected without pattern evidence
- No affordable tool exists for sellers

> **You know fraud is happening.**
> **You just can't see exactly where.**





ShipScan analyses your order history and identifies fraud patterns — so you know which order types to watch before dispatching.



Comprehensive Protection

- √ Fraud score for every order (0-100%)
- √ Address risk detection — flags fake and landmark-only addresses
- √ Plain language explanation for each flag
- √ Specific actions — verify before shipping, block these IPs, watch out for such customers
- √ Downloadable Excel and PDF report (Sample Below)
